

Project and operating requirements

Type in the shaded fields, save a copy, then review it before sharing.

Mark unknowns as "to confirm". Use an attachment for long answers. No automatic submission.

Company and contact

Legal company name, contact person, email and phone.

Project and model reference

Project name, exact MARKKOOL model and Ref. number, drawing revision if known.

Destination and responsibility

Country, delivery location and importer or other responsible party.

Required dates

Sample, approval, first shipment and launch dates. Identify the firm deadline.

Stored product and package

Product type, pack width/depth/height or diameter, weight and orientation.

Temperature and loading

Target product temperature, loading temperature and pull-down expectation.

Operating environment

Ambient temperature, humidity, sunlight, indoor/outdoor and door-opening pattern.

Placement and cabinet format

Available footprint, access, ventilation constraints and preferred cabinet format.

Configuration and order scope

Type in the shaded fields, save a copy, then review it before sharing.

Mark unknowns as "to confirm". Use an attachment for long answers. No automatic submission.

Electrical configuration

Voltage, frequency, plug and any specified components.

Refrigeration requirements

Cooling method, refrigerant, defrost, drainage and climate-class expectation.

Cabinet and accessories

Capacity, doors/glass, shelves, lock, casters, controller, lighting and accessories.

Branding and approval inputs

Artwork files/revision, material and color references, print surfaces and approver.

Pack-out and shelf layout

Target facings, shelf spacing and whether stocked samples or layout drawings are needed.

Order quantities

Sample, pilot, first order, annual forecast and mixed-model or mixed-artwork needs.

Quotation basis

Currency, price-break quantities, Incoterm with named place and quotation validity.

Payment and tooling

Requested terms, sample/tooling charges and banking-document requirements.

Evidence, delivery and open decisions

Type in the shaded fields, save a copy, then review it before sharing.

Mark unknowns as "to confirm". Use an attachment for long answers. No automatic submission.

Milestones and start points

Separate artwork, engineering, sample, production and dispatch. State the start trigger.

Market documents

Required reports, declarations, labels and manuals for the exact market/configuration.

Inspection and acceptance

Critical checks, sampling, test conditions, criteria and third-party inspection needs.

Packing and delivery

Protection, packed dimensions, gross weight, pallet/container plan and unloading limits.

Service and spare parts

Warranty scope, startup spares, manuals, parts lead time and claim pathway.

Supporting files

List filenames and revisions: drawings, package dimensions, artwork, site layout or photos.

Open items and next decision

Unconfirmed requirements, supplier assumptions to quote separately, owner and target date.

Send the reviewed brief and listed files to sales@markool.com.

Final model, performance, compliance and terms must match the written project agreement.
