

Your brand, in the right format.

MK-CR-CC-C075-FG

Can-shaped / full glass lid

WHERE IT WORKS

Indoor promotions, event sampling points and freestanding campaign displays.

WHY CHOOSE THIS FORMAT

Choose a full glass lid when the campaign needs a round, walk-up display with a view of the drinks from above.

BRANDING AREAS

Curved solid body panels; keep the glass lid, rim, ventilation and controls clear.

A clear handoff for your project.

**Petrol Teal**

#006575

**Ink**

#10191A

**Cyan**

#19BFD8

**Ivory**

#F4F5F1

ARTWORK DIRECTION

FIZZIVO / BRING THE BRIGHT. Use petrol teal as the main panel colour, ivory for clear brand lettering, cyan as a limited accent and ink for supporting detail. Small flavour colours may remain on the drinks.

SURFACES TO KEEP CLEAR

Keep the glass lid, hinge and opening path, rim, handle, air openings, controls and service access clear. Use suitable cylindrical body panels only. Confirm the real wrap contour and seam position; do not derive it from the rendering.

PRINT HANDOFF

HEX values are screen references, not an approved CMYK or material specification. Confirm the actual flat pattern, print profile, substrate, adhesion, trim, bleed and safe areas before producing a wrap.

TWO VERSIONS, TWO PURPOSES

R03 updates branding and the project configuration. Drawings, package assumptions, calculated loading and coordinates remain R02. A visual change does not verify cabinet capacity or fit.

R02 LOADING EXAMPLE

Package DIA 67 x H118 mm; 19 per layer x 3 layers = 57-can design target. Required clear space: diameter 371 x H377 mm. Cabinet fit, usable capacity and airflow are unverified.

WHAT TO SEND NEXT

Send the model, destination, quantity, package dimensions and logo. Free branded visual and free loading plan; first visual draft within 48 hours after the model, logo and brief are complete.

PROJECT STATUS

Planning and review only. Hardware, certification, performance, price, MOQ and delivery require separate confirmation.
